ADVICE FOR MARINE BIOLOGY MAJORS IN PLANNING SUMMER COURSES.

To assist you with planning your schedules you should be aware that some of the OIMB summer courses are offered each year and others are offered on alternate years.

**Offered each year:** Invertebrate Zoology, Marine Ecology, Marine Birds and Mammals, Biology of Fishes, Bi 399 Experimental Design and Statistics, Seminar, Biological Illustration workshop

**Offered in alternate years** (2012): Biological Invasions workshop

Some weekend workshops topics are offered on a more irregular basis and depend on the availability of instructors. They include Bioluminescence, Coastal Microbes, Marine Parasites, Biology of Symbiotic Organisms, and Harmful Algal Blooms.
