

Spring 2016 OIMB Seminar Series

Oregon Institute of Marine Biology

Charleston, Oregon

Boathouse Auditorium, Fridays 4:00 pm

- April 1**
4:00 p.m.
7:00 p.m.
Dr. Isabelle Côté, Simon Fraser University
Predatory aliens: Indo-Pacific lionfish on Caribbean coral reefs
PUBLIC SEMINAR: *Caribbean coral reefs: The Oregon connection*
- April 8**
4:00 p.m.
Dr. Rick Grosberg, UC Davis
Family conflicts and life history evolution in marine snails
- April 15**
4:00 p.m.
OIMB Graduate Students
Marie Hunt: *Development of pilidium nielsenii: A non-feeding trochophore-like pilidium*
Kirstin Meyer: *Islands in a sea of mud: Invertebrate communities on dropstones and other isolated hard-bottom habitats*
- April 25***
4:00 p.m.
Dr. Julie Schram, OIMB post-doc
Testing Antarctic tolerance: Invertebrate responses to seawater warming and acidification
***MONDAY SEMINAR**
- April 29**
4:00 p.m.
Dr. Diana Libuda, University of Oregon
Making the right decision: Repairing DNA breaks during meiosis
- May 6**
4:00 p.m.
Dr. Nicholas Gotelli, University of Vermont
Ecological impacts of nitrogen deposition: Insights from the carnivorous pitcher plant Sarracenia purpurea
- May 13**
4:00 p.m.
Dr. Julia Sigwart, Queens University Belfast
Biodiversity dynamics in deep time, and the deep sea
- May 20**
4:00 p.m.
Dr. Amro Hamdoun, Scripps
The secret life of the sea urchin embryo plasma membrane
- May 29**
4:00 p.m.
Dr. Dan Speiser, University of South Carolina
Eyes most numerous: The function and evolution of extracephalic visual systems in molluscs
- June 3**
4:00 p.m.
Dr. Misty Paig-Tran, California State Fullerton
Biomechanics in action: Using marine animals as models for bioinspired application
- June 8**
4:00 p.m.
Special double feature
Dr. Amy Moran, University of Hawaii at Manoa
Title TBA
Dr. Peter Marko, University of Hawaii at Manoa
Title TBA

OIMB Boathouse Auditorium

Please park on Boat Basin Road and walk to the OIMB Boathouse
